Swami's face seen in satellite
image, over an area of around
20 square kilometres.

Count your assets. If you have a clear conscience, a good liver, three good friends and a happy home; if your heart has kept its youth and your soul its honesty—cheer up! You are still one of the richest millionaires of life. I take it to be a principal rule of life not to be too much addicted to any one thing.

— Terence.

OUR MOON

The Moon is our nearest celestial body

It is only 238,700 miles from us and has a diameter of 2,159 miles. Gravity is only 1/6th of that of Earth.

On the dark side of the Moon, temperature is -200°C . On the bright side, it reaches $+100^{\circ}\text{C}$. There is no atmosphere, no light and day, and no sound travels except by radio.
